Lama paved the way for me to craft my brand. Until then, I had written all my achievements on my resume but the one thing I do best and that I love to do most: my brand statement. I appreciated and realized Lama's true caliber as a talented HR professional during the session of the mock-up interview. That was among the best interviews I have ever had: through her questions she triggered all the great memories of my work and flared up my passion for what I love to do.

As an engineering management professional with over 14 years experience in the dairy industry and trying to penetrate the Canadian market I have to say she was the perfect place to start. Thank you Lama [See less](#)

I recently moved to Canada from the UK and I quickly realized that I needed some local guidance to gain employment. I reached out to Lama, due to her vast experience and knowledge in recruitment. Lama was supportive through the whole process, and with her guidance I was able rework my resume and gain a better understanding of LinkedIn to ensure recognition. She would intermittently check how my job search was going and would offer support and encouragement. I received an offer for a role which I have accepted, all thanks to the skills and guidance I gained from Lama. Thank you so much Lama.

Coming to Canada from Dubai loaded with international experience, I knew that I need someone who can guide me to be able to put my experience and achievements in a way that can be well recognized. Working with Lama was a great choice, since she has deep understanding of the way business is done in North America as well as in the Middle East and especially in Dubai & GCC. After doing 4 coaching sessions with here, I was able to better understand my my strengths, my weaknesses & build on my achievements. My resume looks more appealing right now. My LinkedIn profile is more polished and I have better understanding of how to get more views and recommendations. I highly recommend business professionals to work with here, to get a deep insight of your business skills and better present your achievements.
